# Low Cost Co-Lo

Low Cost Data Center Colocation • [www.lococolo.com](http://www.lococolo.com)

Low Cost Co-Lo was developed for IT Departments that need a basic, inexpensive, off-site data center.

The Low Cost Co-Lo program is designed to provide customers with a place to locate equipment in a secure and safe IT environment. Basic service level agreement includes: power, cooling, monitoring, security, racks and rack power distribution. Other services are available upon request.

Whatever your colocation needs are presently, they will be changing in the future. Low Cost Co-Lo offers products and services that will continue to service your business as your needs grow and change.

State of the art colocation facility featuring:

- ⌚ Inconspicuous Accommodations
- ⌚ Ample Storage Capacity
- ⌚ Reliable Security
- ⌚ Power & Environmental Control and Protection
- ⌚ Technical Assistance

Low Cost Co-Lo amenities also include:

- ⌚ Conference Room with Video
- ⌚ Comfortable Waiting Area
- ⌚ Workspace Cubicle and P3 Library stocked with industry related literature
- ⌚ Outdoor Patio / Break Area
- ⌚ Kitchen & Bathrooms

## Connected

The Low Cost Co-Lo facility is served by a redundant fiber loop. These dual honed internet circuits are also linked to CenturyLink and Level 3 at 10Gig and has an 80% upgrade policy on backbone traffic. This access offers ultra fast 1-3ms handoffs to the tier 1 carriers and is fully IPv6 tested and network ready. Other providers can be made available upon request.

The Low Cost Co-Lo monitoring includes power, temperature, air flow, humidity, and moisture. Features include state-of-the-art fully scalable, in-row cooling and modular power distribution to monitored rack PDUs offering complete flexibility and remote monitoring.

## Powered

Low Cost Co-Lo offers clean, filtered power backed up by dual cross tie breakers as well as an onsite generator and Scalable Modular UPS System. The generator supports all facility activities including power, cooling, and monitoring.

## Secure

Low Cost Co-Lo offers 24/7 data center access. All access is restricted by a centralized digital security system controlled by our security administrator.

The building is extremely secure and well designed and was once used as a UL Listed security monitoring station. Security measures include 24/7 monitoring.

1st Level of Security:  
Key Fob Entrance  
Access

2nd Level of Security:  
Man Trap  
Key Fob & Closed  
Door Only Access

3rd Level of Security:  
Bio Metric Vein Pattern Reader Access to  
Data Center

Our facility is discretely located in the heart of the technology center of Omaha, just off the corner of Pacific and 75th Street.

## Omaha Colocation Facility

Power Protection Products, Inc. (P3) was founded over 18 years ago and specializes in power quality and energy enhancing products as well as data center design. P3 represents some of the biggest industry brands and strives to provide the top performing products in the industry. The Low Cost Co-Lo was created to put to use our expansive industry knowledge and expand services available to our customers.

In addition to product sales, distribution, and marketing, P3 is also a leader in customer education through Power Quality University, which provides an educational environment for hands-on training, testing, and evaluation of today's power quality solutions and equipment.

P3 stays on top of industry advances by participating in power quality studies, conferences and seminars with respect to data centers, power and loading analysis, transient voltage detection and power system harmonic analysis & mitigation, ground studies, and power monitoring systems.
