Dear Hiring Manager,

I have known Laura McDonnold for over three years through our work at Power Protection Products. I have since left that job but during my time there Laura was always a friendly face to help me. We worked on many projects together and she always had great ideas to add to what we were working on.

Laura was very valuable as with her skills in graphic design. With my career as an engineer I am not very artistic but Laura always made up for it. She developed much of the marketing material for Power Protection Products including many project specific materials with me.

Laura was always very helpful keeping everything running smoothly with her organizational skills. There were many times when I would misplace documents but Laura was able to help me find them.

Laura is very much a people person. She always seems to remember names when I forget them. She is very outgoing and loves to help people. She always greeted everyone including me with a smile. She was very instrumental in setting up and running the Power Protection Products seminars which involves helping a large group of people.

I believe that Laura would be great for this position.

If you need more information about Laura McDonnold feel free to contact me.

Sincerely,

Nathan Mohling
